

SENSIBLE DEVELOPMENT

110 Airport Road, Suite 102, Westerly, RI 02891

SUMMER 2017

SENSORY INTEGRATION & LANGUAGE CONNECTIONS (SILC)

Led by both an Occupational Therapist and Speech Language Pathologist, SILC group offers opportunities for movement and multisensory learning during thematic language sessions. SILC encourages children to successfully develop, build upon, and use new sensory, motor, and language skills each week while promoting positive peer social and communication skills.

Children 3-6 years old who have identified developmental delays, sensory needs, difficulty understanding or using language, and/or those that need to develop confidence within a group setting would benefit from SILC.

These unique groups are held in our large sensory room that has fun, safe, sensory equipment, toys, and games to help stimulate speech and language, social skills, and physical learning.

To learn more, contact us at (401) 348-9400. Registration forms: sensibledevelopmentforkids.com.
